

Project Design Phase-II Data Flow Diagram & User Stories

Date	18 July 2026
Team ID	
Project Name	HouseHunt - Premium House Rental Marketplace
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Example: DFD Level 0 (Industry Standard)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard	USN-6	As a renter, I can view visits requested, confirmed visits and pending answers on my personalized dashboard.	Dashboard counts update accurately as booking status changes	Medium	Sprint-2
Customer (Web user)	Property Search	USN-7	As a renter, I can search and filter properties by location, price, furnishing and amenities on the web app.	Filtered results and live listing / average-rent statistics display for the selected city	High	Sprint-2
Property Owner	Listing Management	USN-8	As an owner, I can add, edit, publish or draft property listings with images and amenities.	Draft listings stay hidden from public search until published and approved	High	Sprint-2
Administrator	Property Moderation	USN-9	As an admin, I can review and approve or reject submitted property listings before they go live.	Approved listings appear in public search; rejected ones remain hidden	High	Sprint-3
	Complaint Management	USN-10	As an admin, I can view, prioritize and resolve tenant-reported complaints from a single console.	Resolved complaints update status and are removed from the open queue	Medium	Sprint-3
	Payment Ledger	USN-11	As an admin, I can view the platform transaction ledger showing commission, GST and total transaction volume.	Ledger totals match the sum of individual completed transactions	Medium	Sprint-4

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
	CMS Management	USN-12	As an admin, I can manage homepage banners, FAQ entries and scheduled announcements through the CMS console.	Updated CMS content reflects immediately on the public homepage	Low	Sprint-4
