

Functional & Performance Testing Template

Model Performance Test

Date	18 July 2026
Team ID	
Project Name	HouseHunt – Premium House Rental Marketplace
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Property description text input	Enter a valid listing description and one with spam-like/prohibited content	Valid descriptions pass through; spam-like or flagged content is scored and surfaced for review		
FT-02	Numeric field validation (rent, beds, baths, area)	Enter numbers within and outside valid ranges for rent/beds/baths/area_sqft	Accepts valid values, shows error for out-of-range or non-numeric input		
FT-03	Listing moderation scoring	Submit a new property listing and open it in Admin Property Moderation	Listing receives a spam/validation score and appears correctly flagged for Admin review		
FT-04	AI moderation service connection check	Verify the moderation service responds when a listing is submitted	Service responds successfully and returns a score/flag		
PT-01	Response Time Test	Time how long it takes for a submitted listing to be scored	Should be under 3 seconds		

PT-02	Concurrent Submission Test	Submit multiple listings for moderation at the same time	Moderation service should not slow down or fail		
PT-03	Image Upload Load Test	Upload multiple listing images and check processing	Should work smoothly without crashing
