Date	18 July 2026
Team ID	
Project Name	HouseHunt – Premium House Rental Marketplace
Maximum Marks	

Project Overview:

Project Name: HouseHunt – Premium House Rental Marketplace

Project Description: A MERN-stack premium house rental marketplace connecting renters, property owners and administrators through role-based dashboards for search, booking, negotiation, chat, wallet and complaint management.

Project Version: 1.0

Testing Period: To be scheduled by the team

Testing Scope:

Registration & login, property search & filters, tour/booking requests, rent negotiation, real-time chat, wallet & payments, complaint registration, property moderation, CMS & announcements.

User stories USN-1 to USN-12 covering renter, owner and administrator flows (see Data Flow Diagram & User Stories document).

Testing Environment:

URL/Location: Deployed application URL on Vercel (see project documentation)

Credentials (if required): Demo accounts — Admin: shaiksameer@gmail.com / admin123, Owner: john_owner@gmail.com / password123, Renter: alice_renter@gmail.com / password123

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Renter registers, logs in, and views a personalized dashboard	1. Register a new renter account 2. Log in with the registered credentials 3. Open the dashboard	Dashboard loads and shows correct visit/booking counts for the account		
TC-002	Booking status transitions	1. Submit a tour request	Booking status updates to		

	correctly between Pending, Confirmed and Cancelled	2. Owner confirms or cancels it 3. Refresh the renter dashboard	Confirmed or Cancelled and reflects on the dashboard		
TC-003	Owner listing stays hidden from public search until Admin approval	1. Owner creates a new property listing 2. Search for the property as a renter before approval 3. Admin approves the listing 4. Search again as a renter	Listing is hidden from search before approval and visible after Admin approval		
TC-004	Wallet ledger correctly calculates commission and GST	1. Complete a booking payment 2. Open the wallet / payment ledger	Ledger shows 5% platform commission and 18% GST calculated correctly on the transaction		
TC-005	Complaint submission appears in the Admin complaint centre with correct priority	1. Renter submits a complaint about a listing 2. Log in as Admin 3. Open the Complaint & Spam Center	Complaint appears in the queue with the correct priority tag and can be resolved		
...	...	...	...	...	...

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Online payment gateway is not yet integrated; wallet transactions are currently simulated	N/A — feature not implemented	Medium	Open	Planned for a future release
BG-002	Real-time chat does not yet support read-receipts or typing indicators	1. Open chat between renter and owner 2. Send a message	Low	Open	Enhancement for a future release
BG-003	Google Maps preview requires an active internet connection and a valid Maps API key in production	1. Open a property tour request modal without internet / valid API key	Medium	Open	Document as an environment prerequisite
BG-004	Bulk property approval does not support partial rollback if one listing in the batch fails validation	1. Select multiple listings in Admin console 2. Trigger Bulk Approve where one listing is invalid	Medium	Open	Needs per-item rollback handling
BG-005	Push and email notifications for booking status changes are pending	N/A — feature not implemented	Low	Open	Planned for a future release

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
